MEMORANDUM FOR THE RECORD

SUBJECT: Ampex Contract XG 3766

- 1. During the last management meeting at Ampex on the subject contract, it was established that channel simulators being produced by Systems Concepts of San Francisco had become the pacing item. It was further determined that the writer should attempt to expedite the subcontractor in an attempt to recover lost schedule and, failing this too, make sure that no further schedule slips occur on these items.
- 2. A call was placed to Mr. Slingland of Ampex on this date to determine whether the schedule problem at Systems Concepts had resolved itself. Mr. Slingland stated that the subcontractor was still very busy and, while making some progress, was still behind. With this information in hand, a call was placed to Mr. Michael Levitt, president of Systems Concepts. Mr. Levitt was told that CIA is the customer on this program and that it is a critical program which involved large dollars and is substantially behind schedule. He was asked to take management action from his office to attempt to recover schedule. He was also told that he might be asked to attend the next management meeting on the program which will be held on 24 July at the Ampex plant in Sunnyvale. He stated that his firm is small and that he is continuing to recover schedule and will be happy to sit in on the management meeting if requested.
